Professional Summary

Computer Science undergraduate with hands-on experience in Java (OOP), JavaScript, Python, and SQL. Solid grounding in data structures and algorithms, sharpened through 600+ LeetCode problems and full-stack projects. Quick learner who works well in teams — looking for a Software Engineering Internship to build reliable, scalable software.

Technical Skills

Languages: Java (OOP), JavaScript, Python, SQL
Frameworks/Libraries: React.js, Node.js, Express.js, Pandas, NumPy, Matplotlib, Seaborn
Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
Data Analytics: Excel, Power BI, Data Cleaning, EDA, Data Visualization, KPI Reporting
Tools: Git, GitHub, Postman, VS Code, Docker (basics)

Experience

Web Development Intern <i>Acmegrade</i> - Applied object-oriented and structured programming principles to design and build a CRUD-based web application in JavaScript, implementing Create, Read, Update, and Delete operations end to end. - Built interactive, responsive user interfaces using DOM manipulation, event handling, and form validation, working independently and with teammates to meet feature requirements. - Quickly learned new frontend engineering patterns and incorporated them into structured, maintainable code for managing user inputs and dynamic UI state.	May 2024 – Jul 2024
Data Analytics Intern <i>Labmentix</i> - Validated and cleaned 3 large datasets (~10,000+ records each) using SQL and Excel, reducing data errors by ~30% and improving reporting reliability and accuracy. - Built 3 interactive Power BI dashboards to track KPIs, monitor performance, and surface anomalies, improving reporting efficiency for stakeholders. - Documented and resolved 20+ data inconsistencies in collaboration with the team, strengthening quality-validation processes and technical communication.	Jun 2025 – Jul 2025

Projects

Syncora <i>React, Node.js, Express, MongoDB, Tailwind CSS</i> – Live Demo - Built a full-stack, mood-based music discovery app (React/Vite + Express/MongoDB), blending iTunes and Spotify APIs for search and adding a procedural Web Audio engine so music keeps playing when no preview is available. - Implemented JWT auth, a mood journal, playlists, and an analytics dashboard with custom SVG charts; deployed on Vercel and Railway with a JSON-file fallback for offline database access.	
Mental Health Survey Analysis <i>Python, Pandas, Matplotlib, Seaborn</i> – GitHub - Analyzed a global employee mental health survey dataset using Python and Pandas to identify patterns and trends related to workplace mental health. - Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to handle missing values, improve data quality, and derive meaningful insights. - Created visualizations and heatmaps using Matplotlib and Seaborn to communicate key findings and relationships across different survey attributes.	

Education

GLA University, Mathura <i>Bachelor of Technology in Computer Science</i>	2023 – 2027 CGPA: 7.59 (ongoing)
Maharaja Agrasen Public School, Khurja <i>Intermediate</i>	2022 – 2023 Percentage: 83%
Maharaja Agrasen Public School, Khurja <i>High School</i>	2020 – 2021 Percentage: 90.8%

Certifications & Achievements

- Microsoft Azure AI-900: AI Fundamentals (Cloud AI & Machine Learning Concepts)
- Smart India Hackathon — Internal: Top 20 (2025), Top 30 (2023)
- Solved 600+ data structures & algorithms problems on LeetCode
- HackerRank: 5-star in Python, 4-star in C
