PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building responsive, user-friendly web applications using React and JavaScript. Skilled in crafting seamless UI/UX, integrating third-party SDKs, and developing multi-tenant frontend systems that scale across diverse user contexts. Built full-stack applications with REST API backends, optimized for performance and reliability. Eager to contribute to high-impact, product-driven engineering teams building real-world mobility solutions.

TECH SKILLS

- Frontend: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, Responsive Design, Cross-Browser Compatibility
- UI/UX: Component Architecture, Multi-Tenant UI, SDK Integration, Performance Optimization, Animated Interfaces
- Backend: Node.js, Express, REST APIs, MongoDB, MySQL
- Data: Python, SQL, Pandas, Matplotlib, Seaborn
- Infrastructure: Git, GitHub, VS Code, Power BI, Excel, Browser DevTools, Redis (conceptual)

EXPERIENCE

Acmegrade

Web Development Intern

May 2024 - July 2024

- Built a full-stack CRUD web application using React.js, Node.js, and MySQL — focused on intuitive UI/UX and frictionless user flows similar to consumer-facing mobility apps.
- Ensured consistent UI performance across 4+ device resolutions through responsive and cross-browser testing, improving multi-device compatibility.
- Identified and resolved 15+ frontend issues, optimizing component rendering, layout consistency, and overall app responsiveness.

Labmentix

Data analytics intern

June 2025 – July 2025

- Validated and cleaned 3 large datasets (~10,000+ records each) using SQL and Excel, reducing data errors by ~30% and improving report accuracy.
- Built 3 interactive Power BI dashboards to track KPIs and identify anomalies, improving reporting efficiency.
- Documented and resolved 20+ data inconsistencies, strengthening analytical reporting and quality validation processes.

PROJECTS

Personal Portfolio Website [Link](#)

- Developed a responsive, multi-page React application using Vite and Tailwind CSS — optimized for performance across Chrome, Firefox, and Safari with consistent cross-device UI.
- Implemented component-driven architecture with reusable UI modules, improving maintainability and scalability of the frontend codebase.
- Ensured smooth UX across mobile, tablet, and desktop breakpoints through systematic responsive testing and frontend debugging.

Syncora — Full-Stack Music Platform [Link](#)

- Developed a full-stack music platform with a mood-driven React frontend featuring animated dashboards, cinematic auth UI, and a real-time audio player — delivering seamless, frictionless user experiences across devices.
- Integrated Spotify, iTunes, and YouTube IFrame APIs for metadata, previews, and in-app video playback — mirroring third-party SDK integration patterns used in consumer-facing SaaS and mobility platforms.
- Built a Node.js + MongoDB backend with JWT authentication, modular REST API architecture, and AES-sentinel encrypted journal — handling user sessions, mood history, and playlist management at scale.

EDUCATION

- | | |
|--|--|
| • Gla University, Mathura
Bachelor of Technology in Computer Science | CGPA- 7.52 (ongoing)
2023-2027 |
| • Maharaja Agrasen Public School, Khurja
High-School | Percentage - 90.8%
2020-2021 |
| • Maharaja Agrasen Public School, Khurja
Intermediate | Percentage - 83%
2022-2023 |

CERTIFICATES / ACHIEVEMENTS

- Participated in Smart India Hackathon-Internal (2023) and ranked in top 30s.
- Participated in Smart India Hackathon-Internal (2025) and ranked in top 20s.
- Solved 600+ Questions on Leetcode [Link](#)
- Microsoft Azure AI-900: AI Fundamentals (Cloud AI & Machine Learning Concepts)[Link](#)
- 5-star on HackerRank in Python and 4-star in C. [Link](#)
